

Vehicle Diagnostic Training

Bridgwater, Somerset

Worried by wiring?

Confused about CAN Bus?

Distracted by no-code diagnostics?

Bothered at buying unneeded bits?

Fed up with the fault code reader?

Don't struggle to diagnose problem vehicles, take the fast-track, with Technical Topics.

We provide practically based training, designed to help you to fix faults faster, at our independent training workshop in Somerset.

We run a series of one day courses aimed at improving your knowledge and developing diagnostic skills which will improve your efficiency.

Alternatively, book onto our Bootcamp week and save 20% by doing all of the courses in six days. This intensive course is ideal if you are having to travel long distance.

We have a very direct, plain speaking style of training. In the workshop we'll show you what you need to know to improve your first time fix rate. We won't bore you with endless theory.

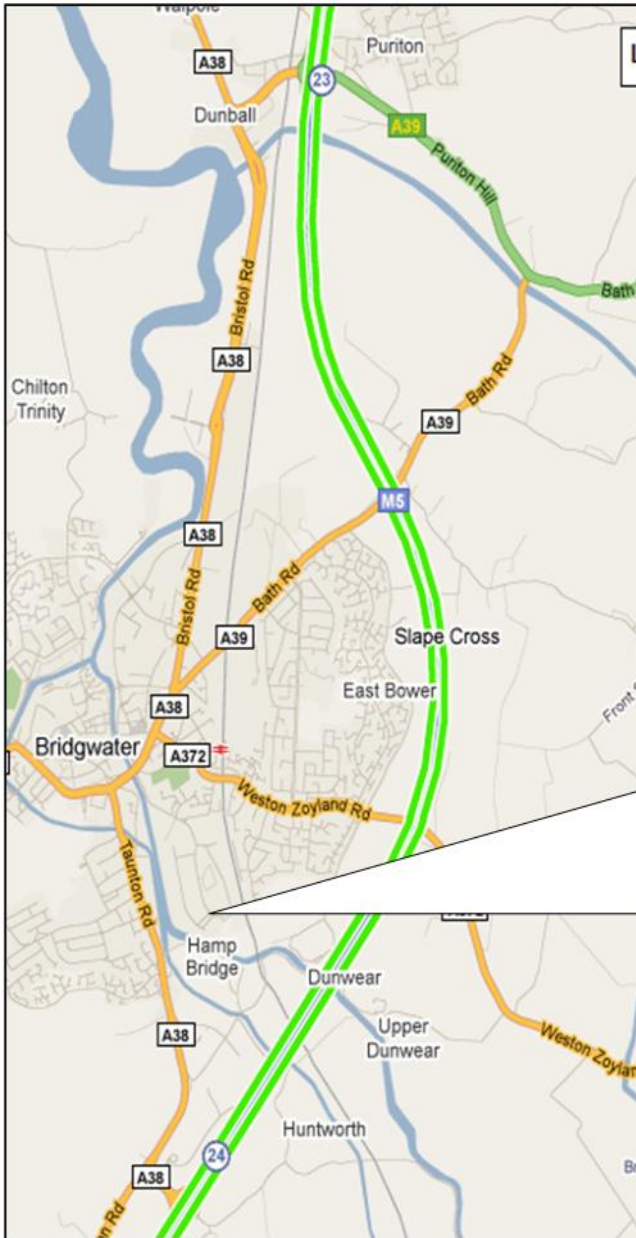

Thousands of garages nationwide have benefitted from our plain speaking style of training.

Bootcamp week costs £768 + VAT
